

Packaging that protects...

**Protecting your
products, your
brand and your
business**

The market leader in
protective packaging

Protecting your products, your brand and your business

Macfarlane Packaging is the largest distributor of protective packaging products and services in the UK, serving over 20,000 businesses nationwide.

We can support your packaging operation at each and every stage, from stock management to packaging design. Our experts can help you to increase efficiency, save time and reduce costs – while simultaneously improving the protection of your products in storage and transit.

Finally, and very importantly, through the right choice and design of packaging, we can ensure your customers have a positive experience.

Our national reach means our expertise and experience is available to you right now, **wherever you are based, to protect your products, your brand and your business.**

We operate through a network of regional distribution centres. Each has a dedicated customer service, procurement, logistics and sales team to support you. Each warehouse is stocked with the widest range of packaging products, to be called off as needed and dispatched in one of our dedicated delivery vehicles.

Our distribution centres have access to products from 650 packaging manufacturers from around the world. These strategic supplier relationships enable us to give you excellent value for money while ensuring the very best quality.

We have a wide range of packaging that includes:

- Stock packaging
- Custom packaging
- eCommerce packaging
- Presentation and retail packaging
- Industrial packaging

Your packaging experts...

Getting your packaging operation right has a big impact on your supply chain costs, operational efficiency and customer satisfaction.

Whether an industrial business shipping heavy but fragile products, a 3PL looking to improve pallet optimisation, or a retailer keen to ensure a positive unboxing experience for customers; we can help.

Your packaging experts, **whatever your market**

Whatever your packaging needs, **we've got it covered**

Industrial

We can save you time and money by managing and streamlining much of your packaging operation. Our innovative solutions will help you to reduce costs, carbon footprint and the complexity of your packaging operation.

Retail

Balancing customer experience whilst managing supply and demand in an online retailing operation is becoming increasingly complex and can be costly. Our innovative approach focuses on solving problems with packaging solutions that deliver speed, accuracy and product integrity.

3PL

Our packaging solutions support both upstream and downstream movements, and our dedicated 3PL team work in close partnership with our customers to help reduce their total supply chain costs.

Wide range of services...

Our services have been developed to support business growth, protect profits and enhance brand perception.

Logistics and Delivery

Efficient and fast deliveries with reduced environmental impact.

We deliver 600,000 orders per year. At the heart of Macfarlane's logistics operation is 'Paragon': an advanced vehicle planning and tracking system that optimises vehicle loading and helps plan the most environmental friendly and efficient route for our fleet of over 100 vehicles ranging from 3 tonnes to 40 ft. articulated lorries.

Inventory Management

Our warehouse is your warehouse.

Our regional distribution centres allow us to offer nationwide coverage. If you're short of storage space, we can store your packaging goods in a clean, safe environment and deliver exactly what you need precisely when required.

Online order management

Customer Connect puts you in control

Order online to make reordering fast, simple and accurate with Macfarlane's online packaging management solution, Customer Connect. Customer Connect is at your service 24/7 and can be organised to provide you with tailored reports that bring you essential data to manage your packaging spend and usage.

Account management

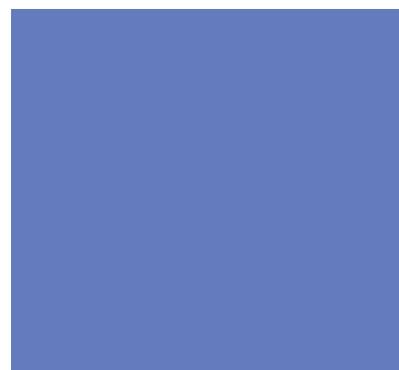

We'll put your perfect package together

We have extensive experience supplying packaging solutions to numerous industries, and can call upon this experience to help you achieve cost savings, and process improvements across your sites.

INNOVATIONLAB

A unique environment for creating innovative packaging solutions

Our Innovation Lab has been designed to problem-solve from start to finish in one location, providing creative solutions that customers can touch, see and take away with them – sometimes even on the same day. We're confident that this will help our customers to save time and money by providing a bespoke solution to their packaging challenges faster than ever before.

There are six significant costs that may be hiding in your packaging operation...

We can help you find them.

Together, the significant six could account for 90% of your packaging costs. This dangerous half dozen could be putting a big hole in your profits. With our help, you can find them and rein them in.

Storage costs

Take a long hard look at the space taken up in your warehouse by packaging stocks. What exactly is it costing you?

Transport costs

Reducing the size and weight of your packages will save on storage and shipping charges, but will your products still be protected?

Damages & returns

We will help you find the right packaging to protect your products, and protect your brand.

Administration costs

How do you drive down your inventory costs to ensure you have the right products exactly when and where they're needed?

Productivity costs

The right pack design reduces the time it takes to collate, assemble and pack each product for shipment.

Customer experience

How the package looks and performs is key to delivering your brand experience.

Quality & environment...

Our commitment to the continual improvement of products focuses heavily on **meeting customer expectations and minimising any impact on the environment.**

We constantly seek to exceed the quality and service levels our customers expect from us. This is driven by a quality management system which is maintained in accordance with the requirements of BS EN ISO 9001.

Packaging is an essential commodity for many businesses, but we place the utmost importance on effective ways of reducing its impact on the environment without compromising on product protection or quality.

We are accredited to ISO 14001, ISO 9001 and EcoVadis Supplier Sustainability.
